

# SkillNet's StoreHub

Store Integration Framework

ORACLE

Platinum  
Partner

## Enable next generation digital stores.

SkillNet's StoreHub is an award-winning integration framework that connects your store to the digital world.

Deliver the store of the future with StoreHub.

## Modular design. Pick and deploy what you need.

StoreHub is a library of integration adaptors that function as individual micro-services that can independently plug-n-play to formulate your tailored integrated solution. Connect your head office, stores, customers, cloud operations, social channels, and digital initiatives with StoreHub.

### LIBRARY OF INTEGRATION ADAPTORS

Oracle Retail applications.

- » Oracle Retail Xstore Point-of-Service
- » Oracle Retail Customer Engagement Cloud Service
- » Oracle Retail Order Broker Cloud Service
- » Oracle Retail Store Inventory Management [SIM]
- » Oracle Merchandise Operations Management [MOM]
- » Oracle Retail Point-of-Service [ORPOS]
- » Other Oracle Retail Stores applications such as Central Office, Back Office, etc.

Other enterprise systems.

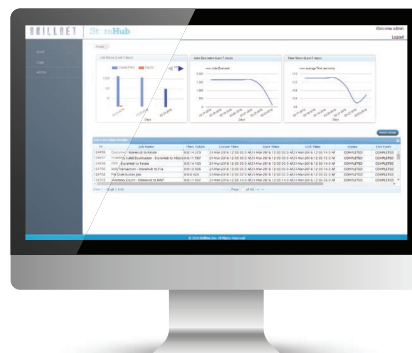

- » Customer relationship management
- » E-commerce
- » Human resource management
- » Workforce management
- » Tax
- » Distribution center
- » Sales audit
- » Other legacy point-of-service and merchandising systems

## Information at your fingertips.

Complete with a customizable user interface. StoreHub's dashboard allows you to see individual transactions and trends across all your services.

### STOREHUB DASHBOARD

- » Configurable and adaptable user interface
- » Monitor data transfers
- » Real-time feedback
- » Graphical representation of trends
- » E-mail reporting capabilities and alerts

## Keep your data in line and efficient.

With SkillNet's StoreHub you can easily map and transfer the data coming in and out of the Oracle Retail applications to other enterprise and next generation digital systems.

### IMPROVE DATA MANAGEMENT

- » Reduce data transfers and provide consistent data types between your applications
- » Improve performance on batch and real-time processing

## Gain an edge with StoreHub.

### SOLUTION BENEFITS

- » Proven solution with over 6 instances deployed to Tier 1 retailers
- » Available on the cloud or on premise
- » Deploy over open source integration framework or Oracle SOA
- » No additional license fees
- » Reduce project implementation time
- » Utilizes integration best practices, Oracle Retail Reference Library, and ARTS data types
- » Built on 20 years of industry experience

“...SkillNet’s StoreHub technology ensures we can go from project start to pilot in a dramatically reduced time and at a significantly lower implementation cost.”

// Chief Information Officer at Leading International Apparel Retailer

## When should I use StoreHub?

### SAMPLE USE CASES

# 01

### Omni-channel integration.

#### LOYALTY PROGRAM

Enable a new loyalty program integrated with all your existing applications.

StoreHub's *Oracle Retail Customer Engagement Cloud Service* adaptor enables retailers to utilize this powerful application in reduced time and effort, quickly integrating across channels and back office.

By integrating *Oracle Retail Customer Engagement Cloud Service* with their existing systems, retailers are able to take the first step to enhance their customer centric digital journeys without replacing the core transactional systems.

# 02

### Acceleration.

#### NEW STORES SYSTEMS

Accelerate your new implementation of *Oracle Retail Xstore*, *Customer Engagement Cloud Service*, or *Order Broker Cloud Service*.

With StoreHub you can integrate new implementations of *Oracle Retail Xstore Point-of-Service*, *Customer Engagement Cloud Service*, and *Order Broker Cloud Service* with all of your existing legacy enterprise systems including tax, distribution center, e-commerce, human resource management, customer relationship management, workforce management, sales audit, and merchandising systems.

StoreHub's library of integration adaptors will accelerate your implementation timeline while reducing cost and improving quality of deliverables.

# 03

### Upgrade.

#### MERCHANDISING

Avoid the need of upgrading all Oracle Retail modules at the same time by enabling integration across versions.

StoreHub's *Oracle Retail Merchandise Operations Management* adaptors allow integration with Oracle Retail applications version 16, providing roadmap flexibility for the retailer on steps for upgrading their systems. With these adaptors retailers can choose to upgrade or introduce *Oracle Retail Store Inventory Management* or *Oracle Retail Xstore POS v16* without the need of upgrading the rest of the platform to version 16.

Also as part of the StoreHub solution, automation and management of the batch load into Oracle MOM is provided removing the need for dedicated, separately licensed products.
