

Protect Profitability

Oracle® Retail XBRi Loss Prevention Cloud Services

ORACLE

Platinum
Partner

Secure your future.

Minimize losses and protect profitability with Oracle Retail XBRi Loss Prevention services from SkillNet.

For many years, retail loss prevention has focused exclusively on detecting and preventing theft. With the availability of XBRi, the loss prevention and store analytical system from Oracle Retail, the focus has shifted to monitoring transactions and establishing an exception-based reporting system to identify transactions and trends that break the pattern of normality.

If exception-based reporting is not a priority for your organization, it should be. After all, retailer losses from internal theft, vendor fraud, shoplifting, and administrative and process errors account for nearly \$128 billion of shrink worldwide just last year.

XBRi implementation.

With Oracle's XBRi system, organizations are given the opportunity to quickly identify suspicious trends, transactions, and other data anomalies to make more informed decisions. At SkillNet Solutions, we can help make sure all the latest dynamic functionality is available to you during the implementation process. Our XBRi Loss Prevention implementation team will guide you through each step in the project including:

PROJECT AND TECHNICAL COMMITMENTS

- » Effective requirements gathering session
- » Assist in banner set creation for mapping
- » Assist in setting up TEST and PROD environments
- » Quality assurance plan
- » UAT support
- » Assist with migrating from TEST to PROD
