

Retail Monitoring Solution

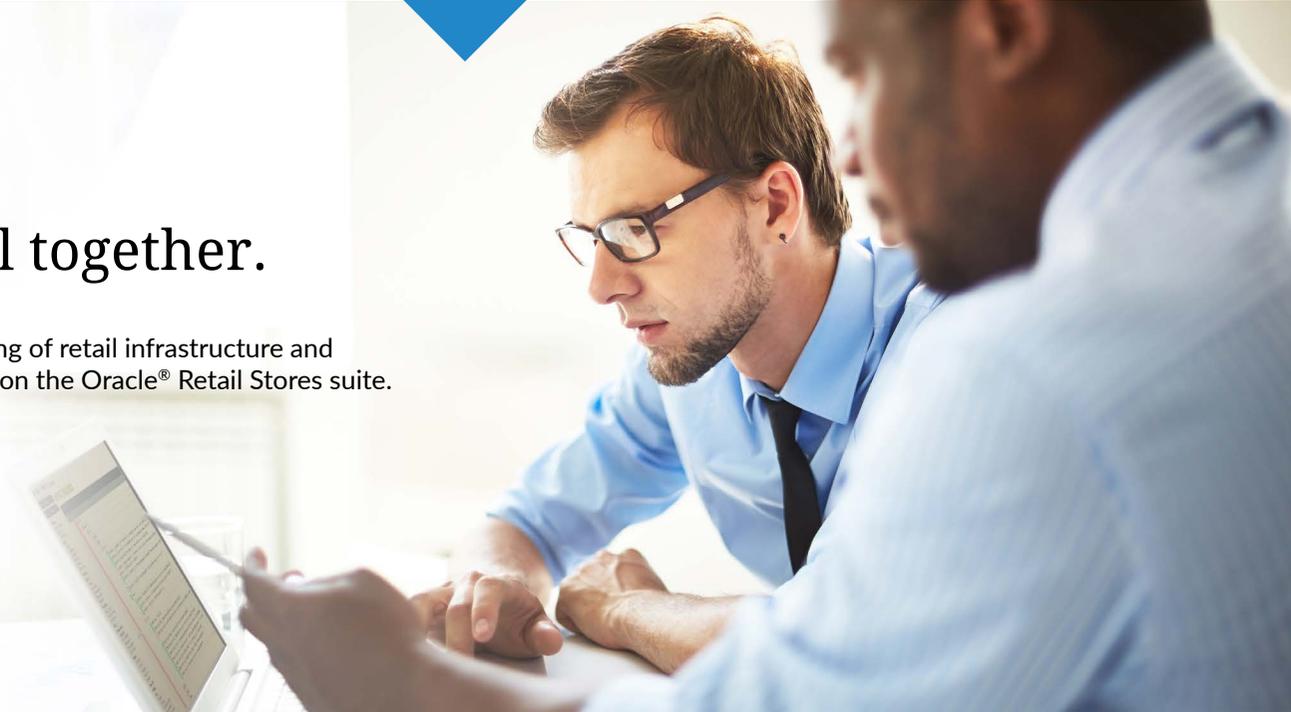

Retail infrastructure and application monitoring

ORACLE

Gold
Partner

Bring it all together.

Consolidated monitoring of retail infrastructure and applications operating on the Oracle® Retail Stores suite.

SkillNet's Retail Monitoring Solution (RetMon) is designed to simplify and consolidate the monitoring and oversight of your retail infrastructure and applications operating on the Oracle Retail Stores suite. From a single, simple dashboard view, you can monitor your retail systems, devices, and applications on your corporate and store networks across multiple locations. Our retail monitoring solution utilizes preconfigured, out-of-the-box monitoring components to quickly and cost effectively give you extensive visibility into the status and health of your retail network.

retmon
SKILLNET

Oversee your retail operations in one place.

You can monitor your retail systems, devices, and applications on your corporate and store networks across multiple locations - all in one place.

NETWORKS

Keep tabs on your corporate and store network availability.

SYSTEMS

Gain insight into the primary and peripheral systems across your corporate and store networks including CPU, memory, and disk operable statuses.

DEVICES

Oversee the performance of the devices on your corporate and store networks, such as POS receipt printers and network printers.

APPLICATIONS

Analyze the applications installed across your networks, including your enterprise/ console application, databases, and the Oracle Retail Stores suite.

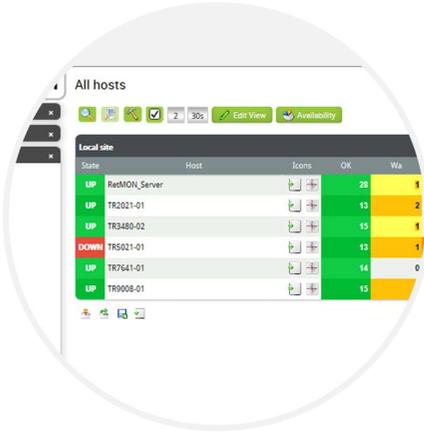

- » Oracle Retail Xstore Point-of-Service
- » Oracle Retail Store Inventory Management [SIM]
- » Oracle Retail Point-of-Service [ORPOS]
- » Other Oracle Retail Stores applications such as Central Office, Back Office, etc.

Retail Monitoring Solution

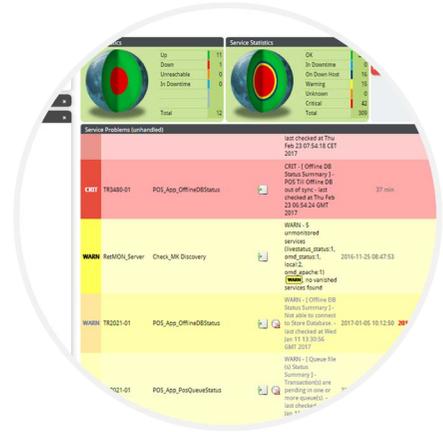

Simplify visibility. Maximize insight.

With RetMon's interactive dashboards bolster visual data discovery, monitoring, and collaboration by everyone on your team, so they proactively respond to critical business alerts right away.

Single view. Extensive scope.

From a single, simple dashboard view, spot issues across multiple channels and locations.

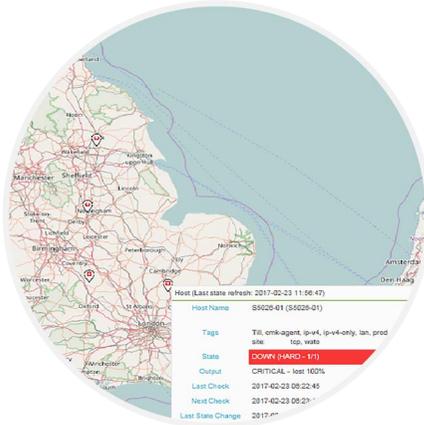

Turn insight into action.

With escalating alert levels, your team can proactively respond to issues across your network.

Visualize performance.

Graphical representations of your data allow you to quickly and easily understand the overall health of your system.

Take it on the go. Mobile ready.

Built with a responsive user interface, our solution provides you access to your retail infrastructure from any device you choose including mobile platforms so you can always stay connected.

Let's get started.
