

SIM Implementation

Accelerator for Android mobile devices

ORACLE

Gold
Partner

Access SIM on your Android mobile device.

Access your new Oracle® Retail Store Inventory Management application on your desktop, tablet, and handheld device--now available on Android OS in partnership with Zebra and SkillNet.

SIM for Android Accelerator.

The Oracle Retail Store Inventory Management application is currently certified to be accessible on handheld devices running Windows Mobile operating system and Apple iOS. However, Android has become an increasingly popular and important operating system used on mobile phones and industrial handheld scanning devices.

Recognizing this gap in usability, SkillNet has worked closely with Zebra to achieve compatibility of the Android Operating System on deployed SIM handheld solutions. SkillNet provided a live SIM environment to catalyze its development, as well as provided expertise on standard SIM handheld business processes. SkillNet also supported the solution's development that Zebra undertook with partner Wavelink by testing the Android Operating System based SIM handheld live on handheld devices.

The SIM for Android accelerator broadens your selection of mobile devices allowing you a more flexible and customized SIM solution all while expediting your overall SIM implementation timeline.

SOLUTION BENEFITS

- » Gain a broader selection of handheld device options that can operate on SIM with the inclusion of Android mobile devices
- » Replace end of life devices with the latest devices from Zebra on Android without complete re-implementation of the SIM solution
- » Decrease the overall cost of implementation for your transformation project
- » Increase efficiency in your core stock inventory management processes in stores

Please contact us at biz.dev@skillnetinc.com or through our website at skillnetinc.com/contact for more information on how we can accelerate your Oracle Retail SIM solution. ■■■■

Implementation Partner of Choice: SkillNet Solutions

Zebra recommends Oracle Gold Partner SkillNet Solutions as their partner of choice to enable your SIM implementation on its Android-based mobile devices. As the #1 Oracle Retail Stores global partner having served over 75 retailers on Xstore and Stores engagements worldwide, SkillNet has been trusted to successfully deliver retail implementation projects of all sizes from small store operations to large Tier-1 retailers. Leverage SkillNet's experience in supporting the development of this solution and gain a partner with expertise in consulting, installation, implementation, and customization of this SIM handheld solution for Android.
